UW-100

Compact Currency Fitness Sorter

Glory introduces a new fitness sorter, based on an extensive field experience!

Unlike conventional models, the new UW-100 comes with three currency pockets, enabling three category fitness sorting (e.g. ATM quality, Teller quality, unit). Moreover, the UW can handle face-orientation sorting with these three pockets. The UW-100 is ideal for bank cash vault, bank branches and armored carriers, which process a large amount of cash for ATM/CD replenishment and shipment to central banks.

High Productivity

The UW-100 sorts currency at a high speed. In addition, the open hopper system and continuous feed mechanism of the UW-100 maximizes efficiency for processing large sums of bills. The auto batch restart features saves time on each transaction by automatically re-starting the UW-100 once the currency is pulled.

Compact Yet Versatile
All of the features and function are packed into a compact desktop size.

User-Friendly Operation

Simply put bills in the hopper and press the start key, the UW-100 will start operating. This user-friendly UW-100 allows an unskilled operator to use the machine without any special training, reducing training and employment costs. The pre-programmed stacker settings will address all of the user's requests.

Operating and changing the UW-100 setup is fast and easy. In addition, the UW-100 is very quiet, producing only 75dB during operation.

Ergonomic Design

The UW-100 is designed for table top operation that minimizes the operators movement thereby reducing stress and tension. The reject pocket and feed mechanism are in close proximity to each other to minimize balancing time.

Option
(Extension hopper)

Functions

- Fitness Sorting
(Soil, Tape, Corner fold, Missing Corner, Tear, Hole)
- Face/Orientation Sorting
- Denomination outsort
- Piece Counting

Specifications

Dimensions(WxDxH mm)	: 550x395x435
Weight	: Approx. 50 Kg
Counting speed	: 720 notes/min.
Hopper capacity	: Approx. 500 notes
Stacker capacity	: 300 notes
Power Supply	: 220 VAC +20%/-15% 50/60 Hz 100 VAC +40%/-15% 50/60 Hz
Power consumption	: Max 116 Wh
